

POWER PATCH™

**High performance cold patch
for long-lasting pothole repair**

- Long-lasting pothole repair mix
- Eliminates the high cost associated with repeated pothole repair
- High performance mixture that can be applied in any weather, even standing water applications
- Effective, enduring solution for repair of utility cuts any time of the day or night
- Long-lasting patch stands the test of time in harsh weather conditions
- Does not track out or leave stains on the roadway

SHELF LIFE

- Stockpiled Power Patch™ has an extended shelf life and can be stored on site for several months.
- Unlike Hot Mix Asphalt, Power Patch™ can be stockpiled; unused portions from one day of patching activities can be used the next day and beyond.

WORKABILITY

- No need to roll Power Patch™. Just shovel into a pothole, mound it 1-2 inches high, and let traffic compact it in.
- Superior workability - it is easy to shovel compared to traditional cold mix.

SUSTAINABILITY

- 100% Recyclable
- Manufactured at a low temperature (175° F)
- Manufactured with sustainable bio ingredients*

**More information available upon request*

DURABILITY

- Great for pavement wheel tracks
- Effective fix for stubborn and high traffic roadways
